

# Working from a Moving Elevating Work Platform (MEWP)

---

## Overview

This 1 day ITSSAR accredited training course will train operators to a certificated standard on the safe and correct use of mobile elevating work platforms.

There are 2 types of MEWP courses available:

- Vertical (Scissor Lift) – Cat A
- \*Boom (Cherry Picker) – Cat B

## Course Content

- Health and safety regulations
- Preventing and controlling accidents
- Personal protective clothing
- Using the operator's manual
- Safe operating methods and identifying hazards
- Theory and practical test

## Course Requirements

You are required to provide your own Machinery, Tools & Personal Protective Equipment (PPE) for this training course. All machinery used on sites must have a valid LOLER certificate and be fit or purpose with no defects.

\*Please note that this training does not include harness training. If operators use harnesses, lanyards, rescue equipment whilst operating this machinery you must consider separate training to cover the procedures for use, inspection, maintenance and storage of fall protection (PPE).
