

Counterbalance Lift Truck Refresher ITSSAR

Overview

This 1 day fully accredited ITSSAR approved Counterbalance Lift Truck Refresher training course is suitable for delegates with a current license.

This ITSSAR approved course provides refresher training for individuals who have already completed the Forklift Counterbalance Truck training and are appropriately certificated to operate industrial counterbalanced forklift trucks.

Regular refresher training will ensure operators:

- maintain good driving habits
- learn new skills where appropriate
- reassess their abilities
- Refresher training or retesting might also be appropriate where operators
- have not used trucks for some time
- are occasional users
- appear to have developed unsafe working practices
- have had an accident or near miss
- have changed their working practices or environment.

It is recommended by the HSE that refresher training take place after a set period of time (eg 3 — 5 years) to make sure employees stay competent (HSE Lift-truck training — Advice for employers).
