

## Rodent-Control-CRRU-Compliant

### Outline

- Stewardship rules apply to the supply and use of rodenticides being authorised for application by professionals outdoors and carrying labels with 'stewardship conditions'
- Pest controllers, farmers, gamekeepers:
- All must be qualified for access to professional products.
- Use rodenticides only after careful consideration of all options.
- Use first those methods you expect to be fully effective but which present lower risks to wildlife
- Rodenticide residues in wildlife are being monitored closely
- HSE, and other government agencies are overseeing stewardship, wildlife residues and rodenticide availability
- The 1/2 day course will be a theory workshop in the classroom followed by a multi-choice assessment.
- Results for the course take approx 14 days.

### Content

- Need for Control
- Eradication Campaign
- Assessing risk
- Chemical Control
- Formulations
- Application
- Presenting bait safely
- Ongoing strategy
- Responsible rodenticide use
- Record Keeping

### Refreshments

- Tea, coffee and soft drinks provided.
