2

Historic Environment Ridge & Farrows

- Pattern of ridges & troughs created by a system of ploughing used in Europe during the Middle Ages, typical of open-field system.
- Also known as rig and furrow, mostly in the NE England & Scotland.
- Created natural divisions used as boundaries when tenants drew lots for a small strip of land within a particular field.
- In a wet year, crop growing on top of the ridge was likely to survive, while in drier weather a good crop could probably be harvested out of the furrow.

Ver 141224

3

3

Historic England

What are the criteria for national importance?

- Period
- Rarity
- Documentation/Finds
- Group value
- Survival/condition
- Fragility/vulnerability
- Diversity
- Potential

Castlerigg Stone Circle, Lake District National Park. The prehistoric stone circle was first scheduled in 1882. NHLE List Entry: 1011362

Min-till or no-till on historic features

- Know location & extent of **any historic features** on your land.
- Register & request an SFI Historic Environment Farm Environment Record to [learn more about historic features on your land.](#)
- Historic features best protected by [converting them to grassland.](#)
- You may be able to **use min-till (to a depth of 10cm) on some buried features.**
- Other buried features & above ground features like earthworks must only **use direct drilling (no-till).**
- Check your **Conservation of Scheduled Monuments in Cultivation Assessment**
- Follow its advice about suitable management for your land.
- If you don't have a **COSMIC assessment** - must use direct drilling farming.
- If you have previously been **advised by Historic England to use min-till on buried features** you should continue to do so.
- You must [find out if you need consent for work on a scheduled monument.](#)

Ver 141224

6

6

Arable Reversion

- Arable reversion involves reverting cultivated land to natural habitat.
- It offers an opportunity to extend & link up existing habitats of high conservation value.

Habitats that can be created include:

- wet grassland,
- heathland,
- chalk grassland,
- flower-rich meadow
- woodland and scrub

Ver 141224

7

7

Maintenance of designed/engineered water bodies

Where to use this option

It's available for CS Mid Tier and Higher Tier on:

- water bodies with an artificially retained area of open standing water
- the banks of the water body & buffer strips around associated features (such as leats and culverts)

Where this option cannot be used

- To include areas of water - only land can be included in a claim
- For field ponds dug to below the water table
- For water meadows (both bedwork & catch meadow systems)
- For water bodies that are covered by the Reservoirs Act 1975
- For raised water bodies that are deemed at high-risk by the Environment Agency under the Flood and Water Management Act 2010

Ver 141224

8

8

Archaeological features and water meadows

Historic monuments: earthworks, masonry, brickwork, clay linings & timberwork

Other structures: islands, bridges, causeways, landing stages, defences & ornamental features

Craft & industry: retting flax and hemp, tanning and metal-working

Food production & cultivation: irrigation systems, aquaculture (eg fisheries & hatcheries, watercress beds)

Ritual & religion: votive offerings and sacrifices

Lost items: weapons, tools, coins & personal effects

Secondary use/s: wells & cess pits, refuse & demolition debris

Biological: pollen, seeds, leaves, wood/ charcoal, diatoms, insects (including beetles & midges), bones, molluscs, ostracods, parasite remains

Non-biological: spheroidal carbonaceous particles, sediment stratigraphy, isotopes, pH

Ver 141224

9

9

Conserving Historic Water Meadows

- **Field observation** - identify earthen ridges & channels
- Examination **derelict channels** & existing watercourses
- **Changes in vegetation** - clues to presence of buried structures
- Documentary sources - **19th century OS maps**, estate plans, tithe and enclosure maps or aerial photographs.
- **Recording the historic features**, including taking photographs.
- Establishing locations of **earthworks and structures** as accurately as possible on maps will be needed for their management.

Ver 141224

10

10

The Countryside and Rights of Way Act 2000 (CROW Act)

Normally gives a public right of access to land mapped as 'open country'

- mountain,
- moor,
- heath & down
- registered common land.

These areas are known as 'open access land'.

Much of the coastal margin that's being created as part of the work to implement the King Charles III England Coast Path is also open access land.

Ver 141224

11

11

Know the signs and symbols of the countryside

Round brown symbol with a person walking over hills - Open Access, you can explore away from paths. This includes many areas of:

- Mountain
- Moorland
- Heath
- Down
- coastal margin
- registered common land

Check the Open Access website (<http://www.openaccess.naturalengland.org.uk/>) for maps, information and any access restrictions.

Ver 141224

12

12

2000 (CROW Act)

What people can do on your land

People can normally access your open access land on foot.

They can:

- walk
- sightsee
- bird-watch
- climb
- run
- There's a general rule that visitors using their open access rights must keep dogs on a short lead of no more than **2 metres between 1 March and 31 July** each year (except in the coastal margin) & at all times near livestock.
- In the coastal margin, dogs must be under effective control at all times.
- In some circumstances you can **exclude people with dogs** completely from small lambing fields and grouse moors.

Ver 141224

13

13

2000 (CROW Act)

What people cannot do on your land

- | | |
|--|--|
| <ul style="list-style-type: none"> • ride a horse or bicycle • drive a vehicle (except mobility scooters and powered wheelchairs) • bring an animal, other than a dog • camp • play organised games • hang-glide or paraglide • use a metal detector • run commercial activities on the land such as: <ul style="list-style-type: none"> • trade or sell • charge other visitors for things they do on your land • film, photograph or make maps | <ul style="list-style-type: none"> • remove, damage, or destroy any plant, shrub, tree or root with intent • light, cause or risk a fire • damage hedges, fences, walls, crops or anything else on the land • leave gates open, that are not propped or fastened open • leave litter • disturb livestock, wildlife habitats with intent • post any notices • commit any criminal offence |
|--|--|

Ver 141224

14

14

The CROW Act excludes the right of access to land known as 'excepted land'

- buildings & their curtilage, such as courtyards
- land within 20 m of a dwelling or building containing livestock
- parks & gardens
- land covered by structures like electricity substations, wind turbines or telephone masts
- quarries and other active mineral workings
- railways & tramways
- golf & racecourses
- aerodromes
- land being lawfully developed in one of the ways above
- land ploughed for the growing of crops or trees within the past year
- temporary livestock pens
- racehorse training gallops – at certain times
- land under Ministry of Defence byelaws, such as most military training areas

Ver 141224

15

15

Rights of way and accessing land

You have the right to access some land for walking or certain other leisure activities.

You can:

- use public roads & pavements or **public rights of way**, for example footpaths or bridleways
- **use your right to roam** on open access land including mountains, moors, heaths, downs, common land and some land around the England Coast Path
- **If neither of these apply, you may still be able to access private land if:**
 - the land was used as a public right of way in the past - check old maps and documents
 - the land was accessed by the public for at least 20 years & nobody has asked them to stop
 - the landowner has given permission ('permissive access')

Ver 141224

16

16

Know the signs and symbols of the countryside

Permissive Path

- Local sign on a post or gate - **permissive path**.
- Follow advice on local signs as **landowners voluntarily** provide access to these paths and choose who can use them.
- Some open access areas are also **made available** in the same way
- Where permission is given for people to **access private** land as a linear route or a defined area.
- This type of access is normally for walking, cycling, or horse riding, **and is not a public right** as provided through Public Rights of Way or open access

Ver 141224

17

17

Know the signs and symbols of the countryside

An acorn symbol - National Trail, created for walking, with horse-riding and cycling possible on some trails.

Users with limited mobility can visit the National Trail (<http://www.nationaltrail.co.uk/>) website to check trail suitability.

This website also contains **maps, trip planning tools** and information on trail diversions.

This symbol marks **16 long distance routes in England and Wales including the England Coast Path**.

Ver 141224

18

18

Know the signs and symbols of the countryside

A yellow arrow - footpath, a recorded right of way for walkers and mobility aid users.

A blue arrow - bridleway, a recorded right of way for walkers, mobility aid users, horse-riders and cyclists.

Ver 141224

19

19

Know the signs and symbols of the countryside

A purple arrow - restricted byway, a recorded right of way for walkers, mobility aid users, cyclists, horse-riders and horse-drawn vehicles only

A red arrow - byway open to all traffic, a recorded right of way for all users including motorised vehicles.

Ver 141224

20

20

The Countryside Code

Applies to England and Wales

Respect everyone

- be considerate to those living in, working in and enjoying the countryside
- leave gates and property as you find them
- do not block access to gateways or driveways when parking
- be nice, say hello, share the space
- follow local signs and keep to marked paths unless wider access is available

Protect the environment

- take your litter home – leave no trace of your visit
- do not light fires and only have BBQs where signs say you can
- always keep dogs under control and in sight
- dog poo – bag it and bin it in any public waste bin or take it home
- care for nature – do not cause damage or disturbance

Enjoy the outdoors

- check your route and local conditions
- plan your adventure – know what to expect and what you can do
- enjoy your visit, have fun, make a memory

Ver 141224

21

21

The Countryside Code

Applies to England and Wales

Rights and permissions

- This code sets out information about the rights of different users.

For some activities you may need to get permission from the landowner, including:

- Camping
- freshwater swimming
- freshwater fishing

Enjoy your visit, have fun, make a memory

Ver 141224

22

22

The Country Trust in the UK

- **UK's leading national educational charity**
connecting children from areas of high social & economic disadvantage with land that sustains us all.
- **Through food, farming & countryside experiences aim to empower children** to be confident, curious and create change in their lives so that they and society can thrive.

What's happening to your pants?

5 May 2023

Soil Scientist, Jen Jones, tells us what's happening to our pants in the soil

23

23

Linking Environment & Farming (LEAF)

- **Working to engage**, inspire and motivate young people through experiential learning, to equip future generations with balanced and informed insight into food production, farming and the environment.
- Work across the **education and agricultural** sectors to **mobilise farmers and educators** to bring food production, farming and the environment into a learning context and embed an appreciation of farming into everyday life

Ver 141224

24

24

Linking Environment & Farming (LEAF)

Farmers

- Provide farmers with knowledge and support to build their confidence and ability to deliver educational experiences including on-farm visits, in-class activities.
- Accredited training for farmers
- Regional networking opportunities
- LEAF Open Farm School Days

Teachers

- LEAF Education provides training and classroom resources to deliver the curriculum through food and farming experiences.
- Accredited Initial Teacher Training (ITT)
- Continuing Professional Development
- Key stage/subject-specific training days
- Countryside Classroom resources

Ver 141224

25

25

Managed By

Open Farm Sunday

- **LEAF Open Farm Sunday**, is one of farming industry's success stories.
- **Since 2006, over 1600 farmers across the UK** have opened their gates to over **2.7 million people** onto farms for one Sunday each year.
- **For everyone, young & old**, to discover what it means to be a farmer producing food, enhancing countryside, goods & services farmers provide.
- Each event is unique based around the **farm's individual story**.
- Activities may include a **farm walk, nature trail, tractor and trailer rides, demonstrations, pond dipping, activities for children, a mini farmers market or farm shop**

Ver 141224

26

26

Farmer Time

Free fortnightly video calls between farmers and classrooms.
Bringing the countryside to life.

Are you are a **farmer** looking to get involved in educating the next generation?

Find out what LEAF Education offers [here](#)

Are you are a **teacher**?

Our team of LEAF Education Specialists deliver high quality, curriculum linked farm visits, in school sessions, virtual sessions, and more! Find out more [here](#)

27

Welcome to NFU Education

As a small team of former teachers, we understand the challenges faced by the profession, so all our resources and initiatives have been designed with three main goals in mind:

- To save teachers time and reduce workload
- To spark learners' passion and enthusiasm for STEM subjects
- To convey important messages about food, farming, and nutrition through a cross-curricular, project-based approach

The Lamb Diaries

NFU Education and NFU Cymru are delighted to bring the farmyard to your primary school, with interactive, bilingual live lessons to celebrate Welsh Farming Week.

Join us LIVE on Wednesday 21st June to see a lamb being born, witness live shearing, help farmer Erin round up her flock and ask her your questions.

Engineering Educates: Farmvention Challenge

The Challenge involves 3 differentiated pathways to inspire 7-14 year olds to think as engineers in the context of British farming. Learners develop their STEM, creativity and collaboration skills through solving problems that make a difference in real-world settings.

Farming STEMterprise

Farming STEMterprise projects involve Key Stages 1 & 2 children completing a range of cross-curricular tasks in order to set up their own farm shop business and design, develop, make and market a brand new food product.

Farmers for Schools

Learn how you can find and arrange speakers to talk at your school and give a unique insight into the world of farming.

Science Farm

Science Farm activities bring the Key Stage 1 Science curriculum to life through farming.

Anytime, Anywhere Engineers

Anytime, Anywhere Engineers introduces learners to the fascinating world of agricultural engineering through a range of interactive 3D tours and workshops hosted by inspiring engineering role models.

Ver 141224

28

Farm diversification

Set up a local farm shop

- One of the simplest, most common ways to **diversify your farm** is by **setting up a farm shop selling your local** produce.
- Most farms already possess all the ingredients to run a **successful farm shop** - fresh produce on tap, authenticity and often well-established within the community.
- This **increase revenue** and make more of your existing products, but can also create jobs within the local community as well as cross-selling opportunities with other businesses and charities

Ver 141224

29

29

Farm diversification

Rent your space for storage

- Does your farm have **unused buildings**
- These are ideal for **diversifying your farm** and increasing your income as they can be rented out as storage.
- From **local sports teams requiring extra room**, to **local businesses** needing a space seasonally, making use of unused barns and buildings can benefit the local community as well as your farm.

30

30

Farm diversification Glamping and camping

- Farmers with land and space, **offering glamping** and camping to the general public is a great way to diversify your farm.
- Adding facilities for glamping like shower blocks, electricity and drinking water will enable you to charge more for guests looking to stay on your land, as well as offering a longer-term diversification solution.
- **Be sure to contact your local authority** to check planning permission and licenses.

Ver 141224

33

33

Protecting your workforce

- **Workers are a key part of expanding a business** it's essential to protect them.
- Robust and **up to date health and safety procedures** in place is essential .
- **Employers' Liability Insurance**. Provides cover for damages and costs you're legally liable to pay should your employee become injured or die, as a result of their employment with you.
- Minimum legal requirement is £5m, but most insurers, provide £10m of cover. Check this would be sufficient to meet your needs.
- **Can be classed as an employee** even if you don't pay them a wage

Ver 141224

34

34

Farm diversification Keeping customers safe

- If venture involves selling directly to the public, then it could mark the first time that you bring paying visitors onto your farm.
- **Public Liability** Insurance should be a key consideration. It protects your business if it's held responsible for accidental injury to customers or the wider public, or damage to their property.
- Some Farm Insurance policies such as **Farm Essentials**, provide Public Liability cover as standard.
- Worth thinking about whether your diversification will require **Product Liability**, which **protects your business if it's held liable for the death**, injury or property damage to third parties caused by the sale or provision of products.
- **Always check with your insurer** that you're appropriately insured for your diversification.
